

Occhio

Più plus

Più / R / RS

A minimalist studio setting with a man sitting on a chair, illuminated by spotlights. The scene is set in a white, curved room with a dark floor. A man in dark clothing is seated on a black folding chair, facing away from the camera towards a bright circular spotlight on the wall. Another large circular spotlight is visible on the wall to the left. A tall, thin floor lamp stands on the left side of the frame. The ceiling is white with two recessed spotlights. The overall atmosphere is clean and modern.

The power of innovation The Più plus spotlight system opens a new chapter in the evolution of light. It unites modularity with a fresh, puristic design; new models and optics create unlimited possibilities for use. The ideal solution for every situation: That's Occhio.

Più

Puristic Clean lines represent the unifying element of all Più plus models, with the »double hull« forming its unique design feature. The »floating« lens in the middle gives the spotlight its unmistakable character.

double hull

Più R

cone glass

Striking The design of the Più R makes a compelling statement with its clear, minimalist lines. The flat cone glass creates a dynamic look while capturing the optical insert; the interior of the spotlight houses the characteristic Occhio lens that produces brilliant, glare-free light.

Intelligence

Sophisticated The Più plus spot light system connects recessed and surface mounted spotlights in a comprehensive, modular system. Thanks to the newly developed mains-voltage technology, the surface mounted spotlights can now be installed without remote power supply units: »plug & play« with the Occhio »ac« light engine – the new simplicity!

perfect
color

Exemplary The only valid reference for Occhio is the sun itself. The quality of light of our new »perfect color« LED comes very close to this ideal: Colors appear with as much nuance and depth as they do in nature. Because quality of light means quality of life.

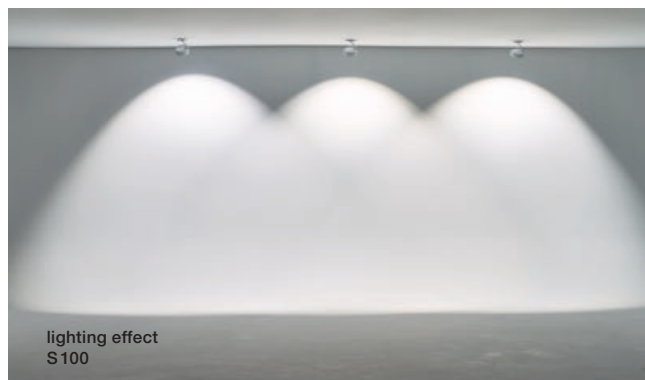

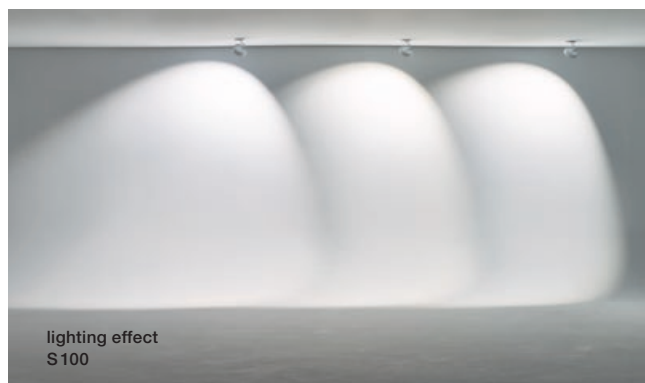

color rendering – The perceived quality of light is determined by the quality of rendering of the visible light spectrum. The measuring unit is the so-called color rendering index (CRI); as a reference, natural sunlight has a CRI of 100. The Occhio »perfect color« LED come very close to this optimum with a CRI of 97 and ensure the best possible color rendering.

Premiere

Unlimited Characteristic Occhio lens optics work in synergy with changeable inserts to produce a quality of light that inspires. It allows people to shape the lightscapes of their personal space – with virtually unlimited choices.

Più RS

Powerful Più RS ambience spotlights satisfy with high luminous power thanks to intelligent heat management. Their zoom and 3d kinematics features offer the utmost in flexibility. Thanks to the new Occhio »ac« light engine the surface mounted spotlights don't need remote drivers. With its extraordinary floor spotlights basso and terra, Più RS opens up entirely new possibilities in lighting design.

a class of its own

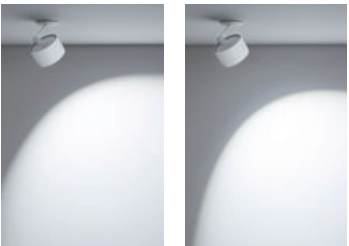

Precise Più RS is equipped with an innovative zoom function with which the beam can be set continuously from 20° to 60°. This works in synergy with the three-dimensional movement of the luminaire head and provides an exceptionally flexible, situation-based lighting design for private and public spaces.
